Education

Vishwakarma Government Engineering College

August 2017 - June 2021

B.E in Computer Engineering (CGPA of 8.56)

Gujarat, India

Experience

Distinction Dev - Elevation Services

June 2023 - Present

Senior Software Developer

Gujarat, India

- Led the mobile application team which is in charge of building and designing a Fin-tech application from scratch.
- Working on a project that entails maintaining an application with around **1 million users**.
- Setting up CI/CD pipelines using **App Center** and **GitHub Actions** to improve building and distribution process
- Set up **Bio-metrics** authentication for **security** purpose
- Implemented **code push** to send **over the air** updates

Bacancy Technology

July 2021 - June 2023

Software Engineer

Gujarat, India

- I was working as React native developer and I was responsible for **designing, maintaining** and **building** Pixel-perfect smooth UI and user-friendly mobile applications.
- Worked on a project that entails maintaining an application with over **30,000 users** and I am in charge of implementing feature requests and bug fixes.
- Improved navigation time by up to **50%** by fixing **deep linking** functionality and handling **notification** click redirects

Bacancy Technology

Jan 2021 - June 2021

Software Engineer Intern

Gujarat, India

- Implemented **Restful APIs** and integrated **Redux** for state management and reduced API calls by **500** milliseconds by using the **debounce** technique in the search module.
- Fixed UI issues on small devices that **20+** users have complained and published **2** technical articles about implementing the **redux-form** library in React Native.

Projects

Chat Application | React Native, Redux, Typescript, Firebase | GitHub | Preview

- Developed a real-time messaging interface that makes it simple to send and receive messages from individuals around the world.
- Used React native framework for building user interactive interface across **Android** and **IOS** platform.
- Created enhanced Chat Room using **react-native-gifted-chat** module.
- Achieved real time updates for sending and receiving message using **Firebase Real time database**.

Whiteboard Sharing Application | React, Node Js, Bootstrap | GitHub | Preview

- Collaborating on a digital whiteboard is a great way to generate ideas and build projects. So i made a platform Users can share their whiteboards with other users.
- Developed user interface using **React Js** and **Bootstrap** and used **Rough Js** library to draw different graphics on the Whiteboard.
- Broadcast White board changes using **Socket.IO** and **Node Js** is used as a back end service.

Coding Profile Links

- GitHub
- Leetcode
- Codechef

Achievements

- Solved **400+** problems on leetcode.
- Won **Team of the Quarter** award for Q4 2021 at Bacancy Technology
- Won **Best Team Player** award at Distinction Dev/Elevation Services.

Technical Skills

Proficient in **Object Oriented Programming**, **SOLID** principles and **Design Patterns**.

Languages: C++, Java, HTML/CSS, JavaScript, Typescript

Technologies/Frameworks/Libraries: React Native, ReactJS, Redux, zustand, Node Js, AWS

Database: MySQL, MongoDB, Dynamo DB, Firebase
