Education

Vishwakarma Government Engineering College   **August 2017 - June 2021**
B.E in Computer Engineering(CGPA of 8.56)   *Gujarat, India*

Experience

Bacancy Technology   **July 2021 - Present**
Software Engineer   *Gujarat, India*

- I am working as React native developer and I am responsible for **designing**, **maintaining** and **building** Pixel-perfect smooth UI and user-friendly mobile applications.
- Working on a project that entails maintaining an application with over **30,000 users** and I am in charge of implementing feature requests and bug fixes.
- Improved navigation time by up to **50%** by fixing **deep linking** functionality and handling **notification** click redirects
- Participated in design discussions with other 3 developers regarding application architecture and feature implementation.

Bacancy Technology   **Jan 2021 - June 2021**
Software Engineer Intern   *Gujarat, India*

- Implemented **Restful APIs** and integrated **Redux** for state management.
- Reduced API calls by **500** milliseconds by using the **debounce** technique in the search module.
- Fixed UI issues on small devices that **20+** users have complained
- Understood native build tools, like XCode, Gradle
- Published **2** technical articles about implementing the **redux-form** library in React Native.
- Designed and developed Interactive UI and re-usable components.

Projects

Chat Application | *React Native, Redux, Typescript, Firebase* | GitHub | Preview

- Developed a real-time messaging interface that makes it simple to send and receive messages from individuals around the world.
- Used React native framework for building user interactive interface across **Android** and **IOS** platform.
- Created enhanced Chat Room using **react-native-gifted-chat** module.
- Achieved real time updates for sending and receiving message using **Firebase Real time database**.

Whiteboard Sharing Application | *React, Node Js, Bootstrap* | GitHub | Preview

- Collaborating on a digital whiteboard is a great way to generate ideas and build projects. So i made a platform Users can share their whiteboards with other users.
- Developed user interface using **React Js** and **Bootstrap** and used **Rough Js** library to draw different graphics on the Whiteboard.
- Broadcast White board changes using **Socket.IO** and **Node Js** is used as a back end service.

Achievements

- Solved **400+** problems on leetcode.
- Won **Team of the Quarter** award for Q4 2021 at Bacancy Technology

Coding Profile Links

- GitHub
- Leetcode
- Codechef

Technical Skills

Proficient in **Object Oriented Programming** , **SOLID** principles and **Design Patterns**.

Languages: C++, Java, HTML/CSS, JavaScript, Typescript

Technologies/Frameworks/Libraries: React Native, ReactJS, Redux, Node Js

Database: MySQL, MongoDB, Firebase
